### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: the claims are allowable over prior art of record, because none of the references in alone or in combination discloses:

**A device for variably attenuating an optical signal comprising:**

- a waveguide having a cladding and an electro-optical material adjacent to at least a portion of said cladding; and
- at least two electrodes to produce an electric field within said electro-optical material.

where the attenuation of light through said waveguide varies with an applied voltage difference to said at least two electrodes, as discloses in claims 1, 7, and 14.

The underline limitations are critically, since the device for variable attenuating an optical signal is improved: avoid distort the information being transmitted; avoid suffer from high power usage and slow response time.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
